

# ILITek TP Tool

## User Guide

Version: V1.06  
Release Date: Nov.22,2012

### ILI TECHNOLOGY CORP.

8F, No.38, Taiyuan St., Jhubei City, Hsinchu County 302,  
Taiwan, R.O.C  
Tel.886-3-5600099; Fax.886-3-5600055

## Document Revision History

Version	Data	Author	Description
1.00	2012/10/25	Jay	Fire Version
1.01	2011/4/14	Jay	Update for AP Version V1.1.0.13
1.02	2011/4/25	Jay	Update for AP Version V1.1.0.15
1.03	2011/5/30	Jay	Added Bridge Out-Drawing
1.04	2012/2/08	Jay	Added Power Bar
1.05	2012/8/17	Kevin Chang	Update for AP Version V1.1.23.9
1.06	2012/11/22	Kevin Chang	Added I2C Bootloader Error Message Added I2C Bootloader Offline Programming

## 1 Description

ILITek TP Tool supports USB and I<sup>2</sup>C interface (required ILITek Bridge) and is used for ILITek capacitive touch solution related product.

### 1.1 System Requirement

- The ILITek capacitive touch-related products.
- RAM at least 2G.
- The operating system of Windows XP or above grade.

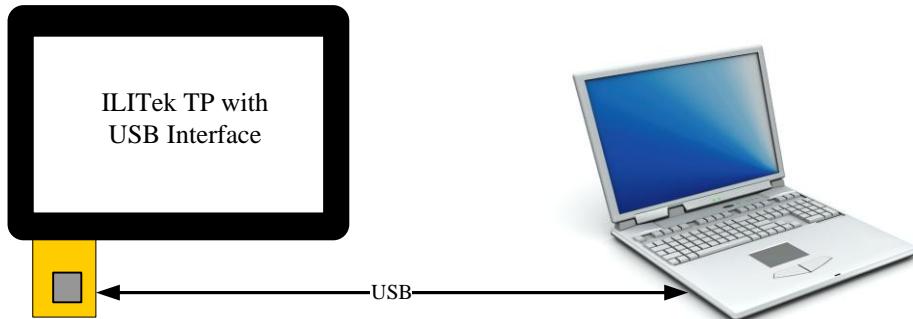

Figure 1-1: System Drawing with USB interface.

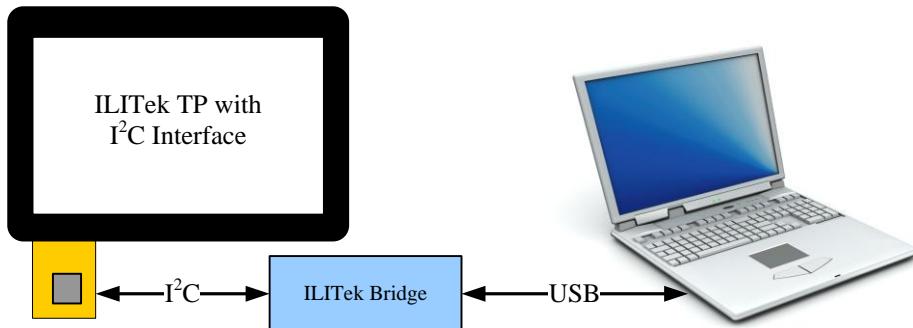

Figure 1-2: System Drawing with I<sup>2</sup>C interface.

## 1.2 ILITek Bridge (I<sup>2</sup>C to USB)

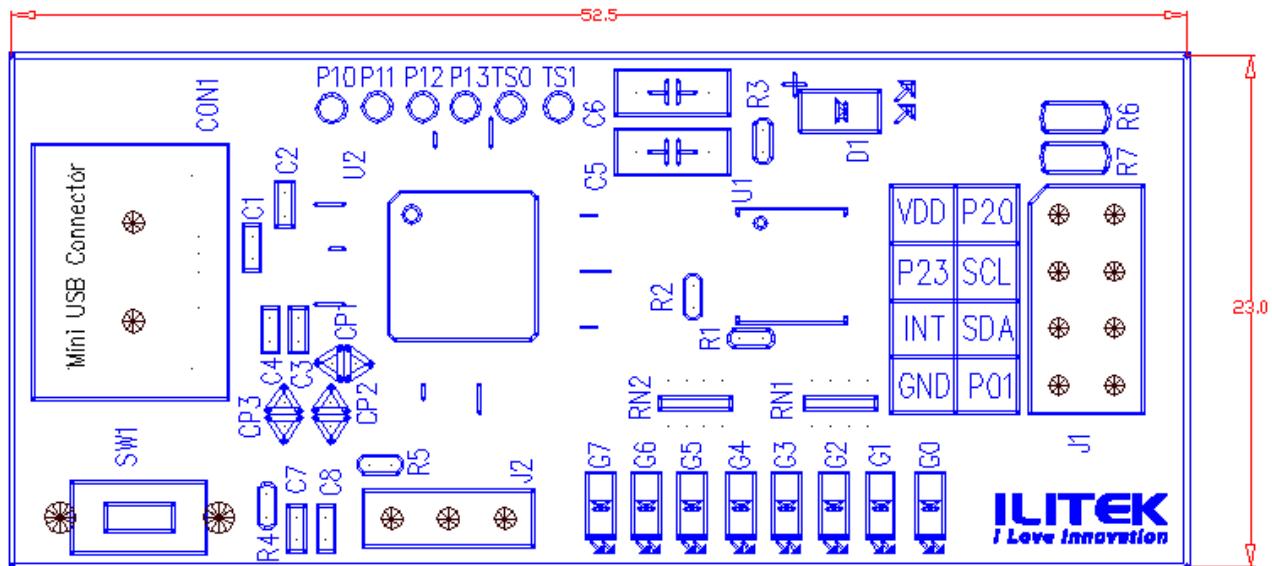

Figure 1-3: ILITek Bridge drawing

- 2-layer FR4 PCB

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

### 1.3 Main UI Description

- Legal Notice

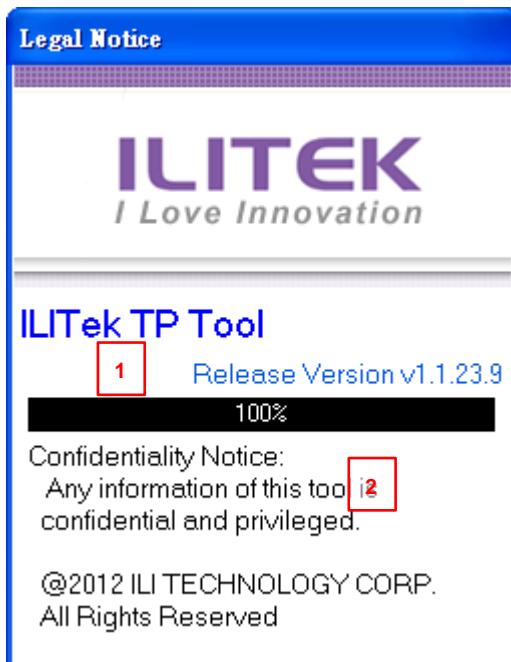

Figure 1-4: Legal Notice

Table 1-1: Detailed explanations of Legal Notice UI

No.	Item	Description
1	<b>Release Version</b>	Software release version
2	<b>Legal Notice</b>	Any information about this tool is confidential and privileged. Do not spread any.

---

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

- Main Form

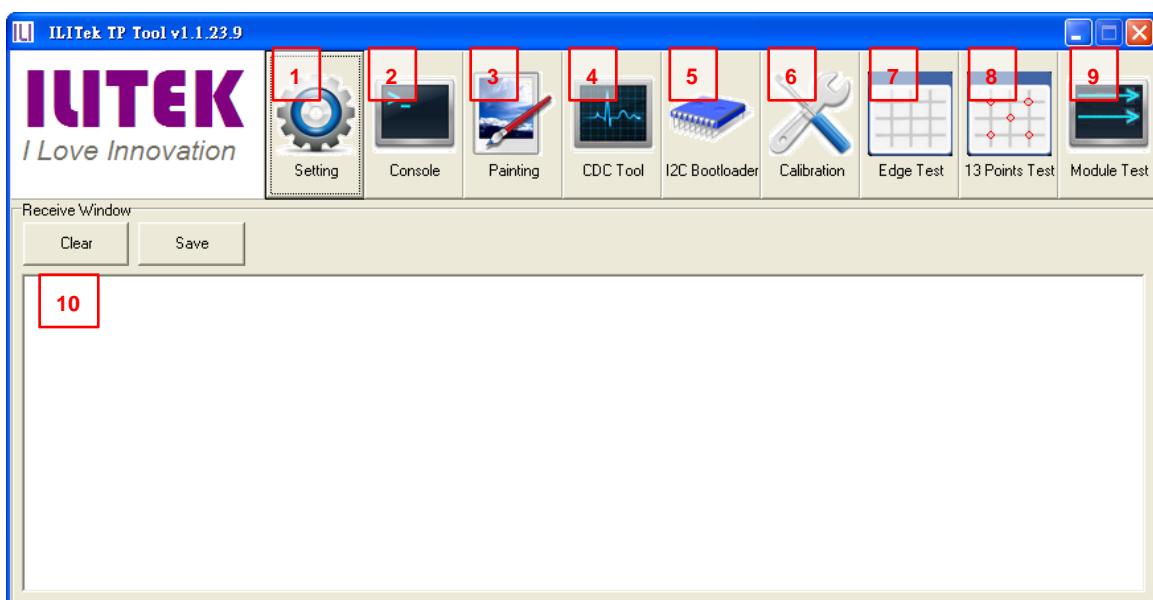

Figure 1-5: Main Form

Table 1-2: Detailed explanations of Main Form UI

No.	Item	Description
1	<b>Setting</b>	Interface setting and function setting
2	<b>Console</b>	Show TP receive data
3	<b>Painting</b>	Painting function
4	<b>CDC Tool</b>	Show CDC data
5	<b>I2C Bootloader</b>	Upgrade I <sup>2</sup> C firmware tool
6	<b>Calibration</b>	Mass production calibration tool
7	<b>Edge Test</b>	Single touch painting test in the edge
8	<b>13 Points Test</b>	13 points touch location test
9	<b>Module Test</b>	TP module function test
10	<b>Receive Window</b>	Show receives data

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

## 2 Function Description

### 2.1 Setting

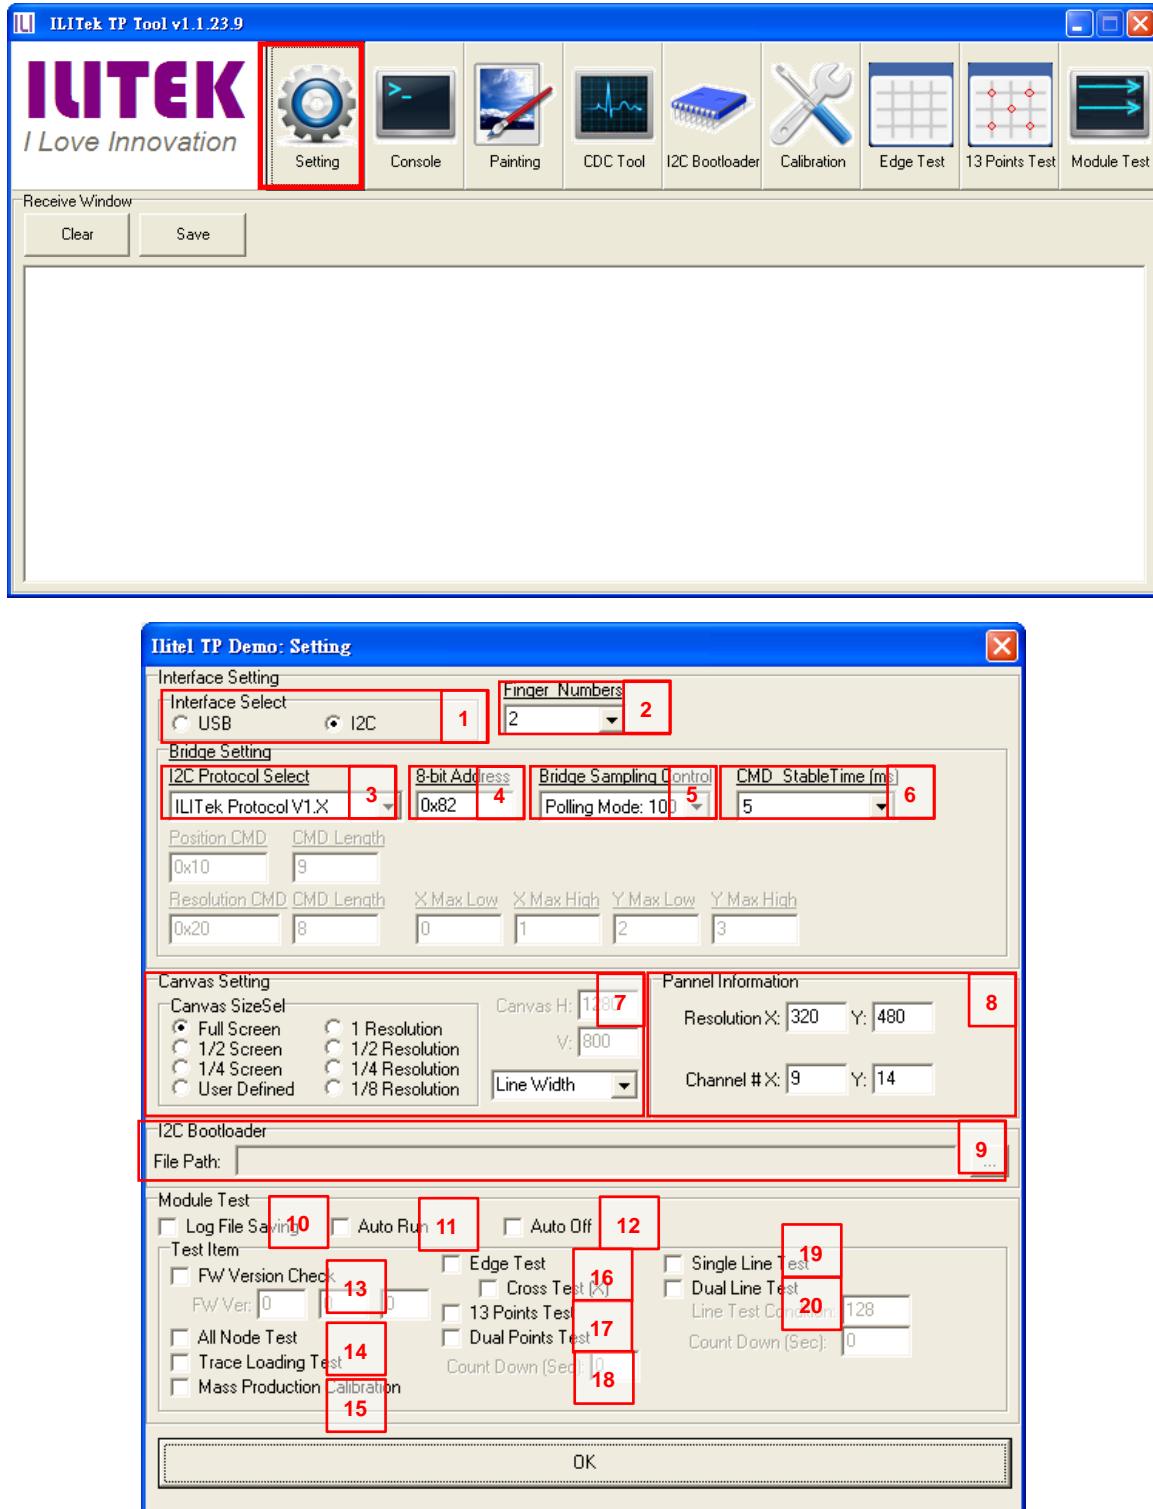

Figure 2-1: Setting

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

**Table 2-1: Detailed explanations of Setting UI**

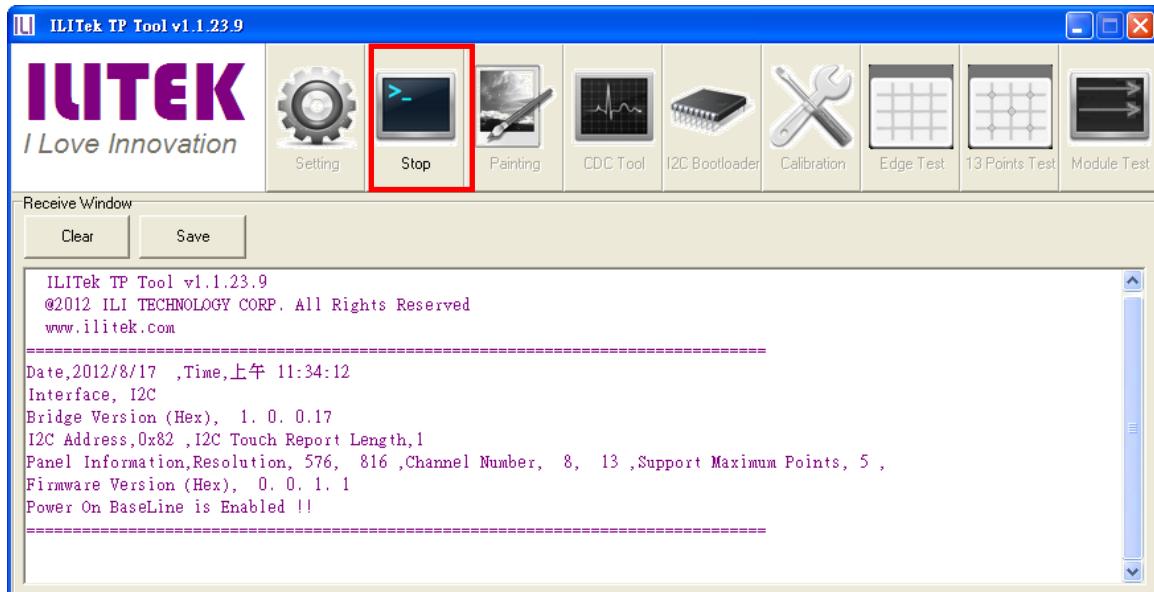

No.	Item		Description
1	<b>Interface Select</b>		USB or I <sup>2</sup> C Interface
2	<b>Finger Numbers</b>		Select the maximum finger numbers
3	I <sup>2</sup> C Protocol Select	<b>User Define</b>	This item is only supported by ILITek member.
		<b>ILITek Protocol V1X</b>	V1X protocol only maximum support two-finger
		<b>Addr: 0xB8,Length 10 Bytes</b>	Support I <sup>2</sup> C address 0xB8 protocol
		<b>MTK V0.81</b>	Support MTK protocol spec. V0.81
		<b>ILITek Protocol V2X</b>	V2X protocol support more than two-finger
		<b>Exxx</b>	Support Exxx protocol spec.
4	<b>8-bit Address</b>		ILITek default value is 0x82; Same as 7-bit I <sup>2</sup> C address 0x41
5	<b>Bridge Sampling Control</b>		If <u>INT</u> is using interrupt mode, this item select "Interrupt Mode". Otherwise, the user could select bridge sample timing which the maximum speed is 125Hz
6	<b>CMD Stable Time</b>		Receive command data stabled time. (ILITek suggests more than 15ms.)
7	Canvas Setting	<b>Canvas Size Select</b>	Canvas size selects for Patting Function
		<b>Line Width</b>	Line draws width for Patting Function
8	Panel Information	<b>Resolution</b>	Touch panel resolution
		<b>Channel #</b>	Touch panel channel numbers
9	<b>I<sup>2</sup>C Bootloader</b>		I <sup>2</sup> C Bootloader default path
10	<b>Log File Saving</b>		AP auto-save the data of message box after module test
11	<b>Auto Run</b>		AP auto-execute "Module Test" function
12	<b>Auto Off</b>		AP auto-off when "Module Test" is finished
13	<b>FW Version Check</b>		Check the firmware version in module test
14	<b>All Nodes Test and Trace Loading Test</b>		Check CDC Value in module test
15	<b>Mass Production Calibration</b>		Execute mass production calibration in module test
16	<b>Edge Test</b>		Execute edge test in module test
17	<b>13 Points Test</b>		Execute 13 points test in module test
18	<b>Dual Points Test</b>		Execute dual points test in module test
19	<b>Single Line Test</b>		Execute single line test in module test
20	<b>Dual Line Test</b>		Execute dual line test in module test

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

## 2.2 Console

ILITek TP Tool supports Console function.

All received data will show in Message Box.

**Figure 2-2: Console**

## 2.3 Painting

ILITek TP Tool supports Painting function.

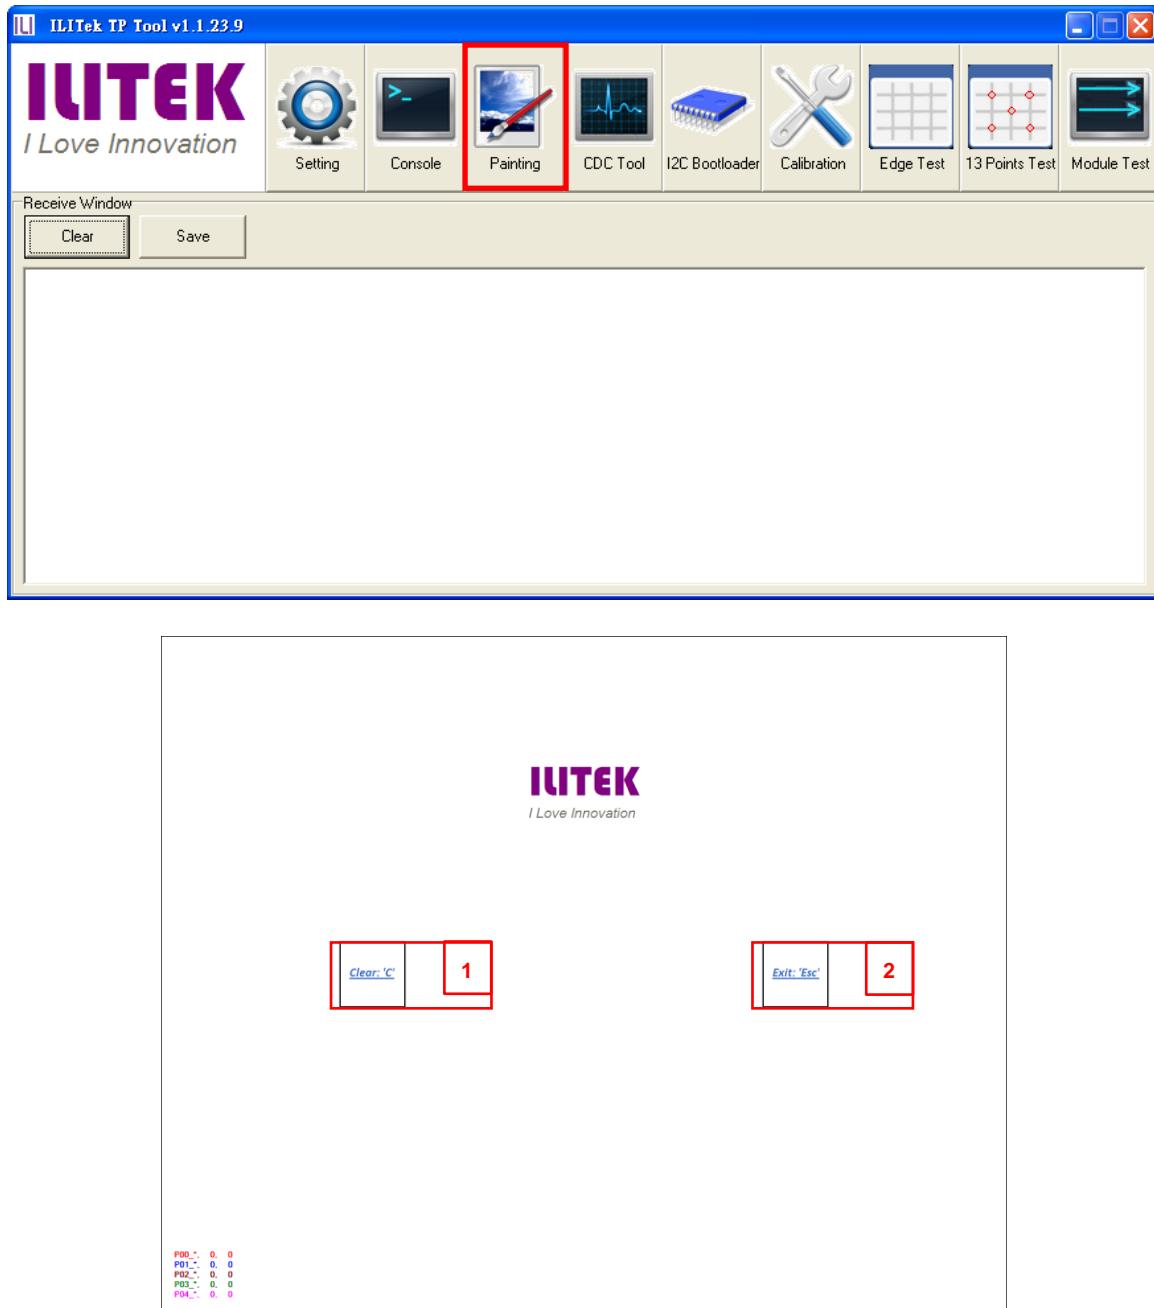

Figure 2-3: Painting

Table 2-2: Detailed explanations of Painting UI

No.	Item	Description
1	<b>Clear : 'C'</b>	User clicks the area, AP will clear the canvas
2	<b>Exit : 'Esc'</b>	User clicks the area, AP will close this function

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

## 2.4 CDC Tool

ILITek TP Tool supports CDC function.

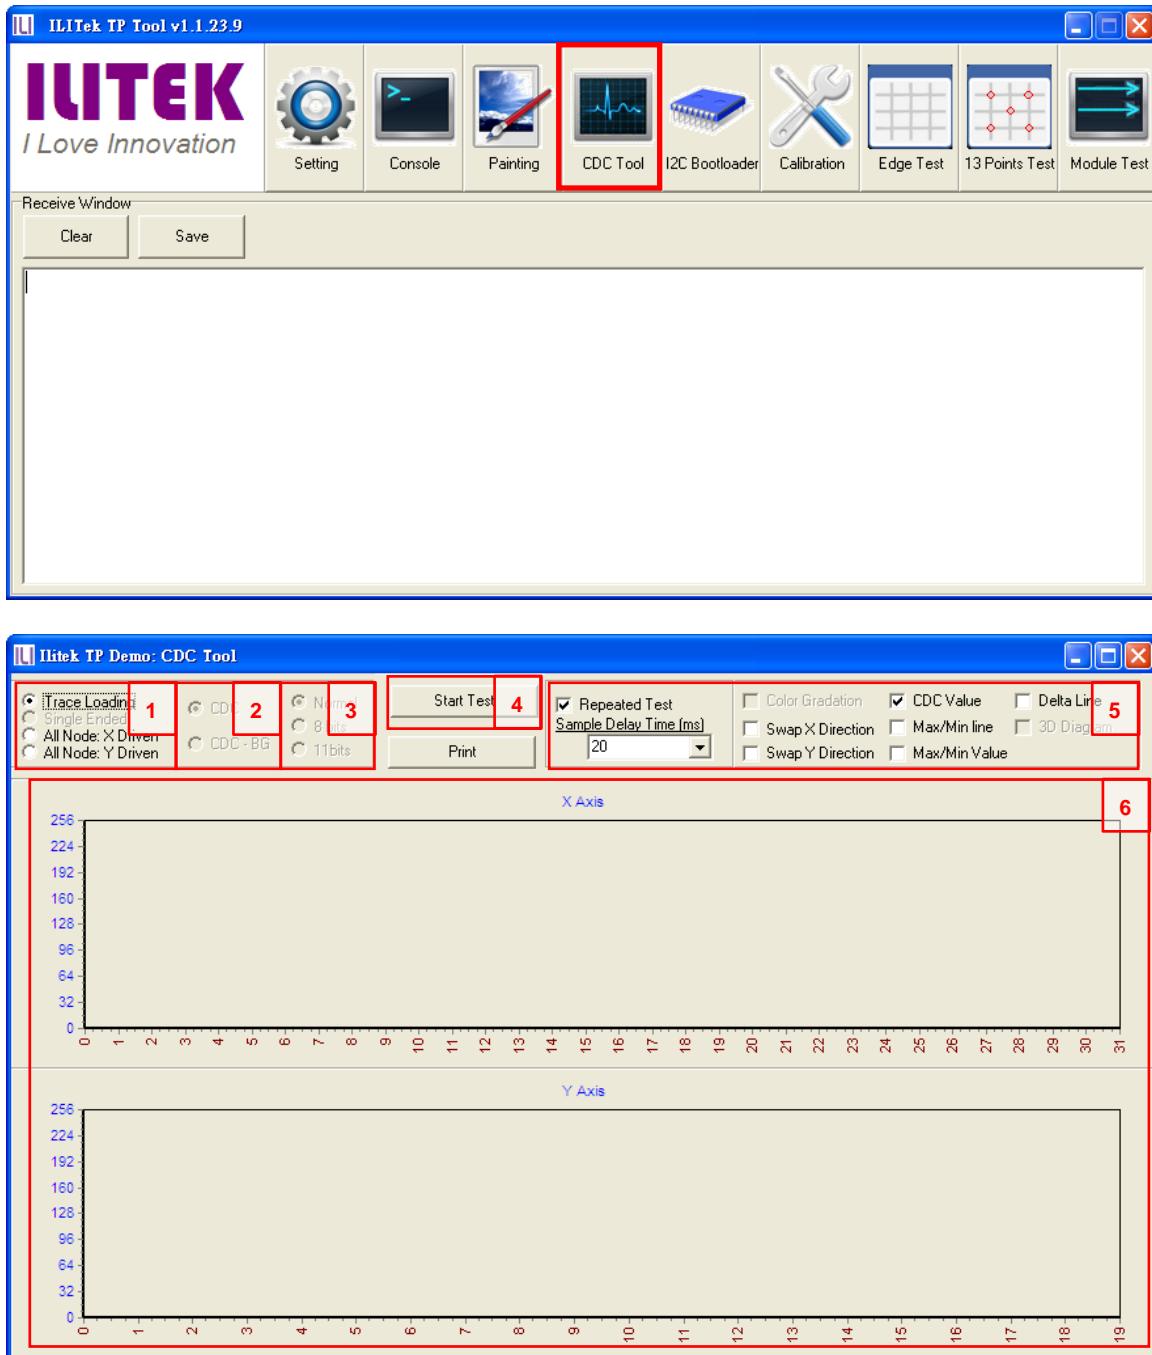

Figure 2-4: CDC Tool

---

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

**Table 2-3: CDC Tool UI Description**

No.	Item	Description
1	<b>Sensing Method</b>	CDC sensing method
2	<b>Data type</b>	CDC data type
3	<b>Data Format</b>	CDC data format
4	<b>Start Test</b>	Start CDC test
5	<b>Repeated Start</b>	Repeat the test
	<b>Sample Delay Time</b>	The sample delay time of every frame
	<b>Color Gradation</b>	Show the result by color gradation
	<b>Swap X Direction</b>	Reverse X axis
	<b>Swap Y Direction</b>	Reverse Y axis
	<b>CDC Value</b>	Show the CDC value
	<b>Max/Min Line</b>	Show the max/min line
	<b>Max/Min Value</b>	Show the max/min value
	<b>Delta Line</b>	Show the delta line
	<b>3D Diagram</b>	Show diagram in 3D
6	<b>Test Result</b>	Show test result in this scope

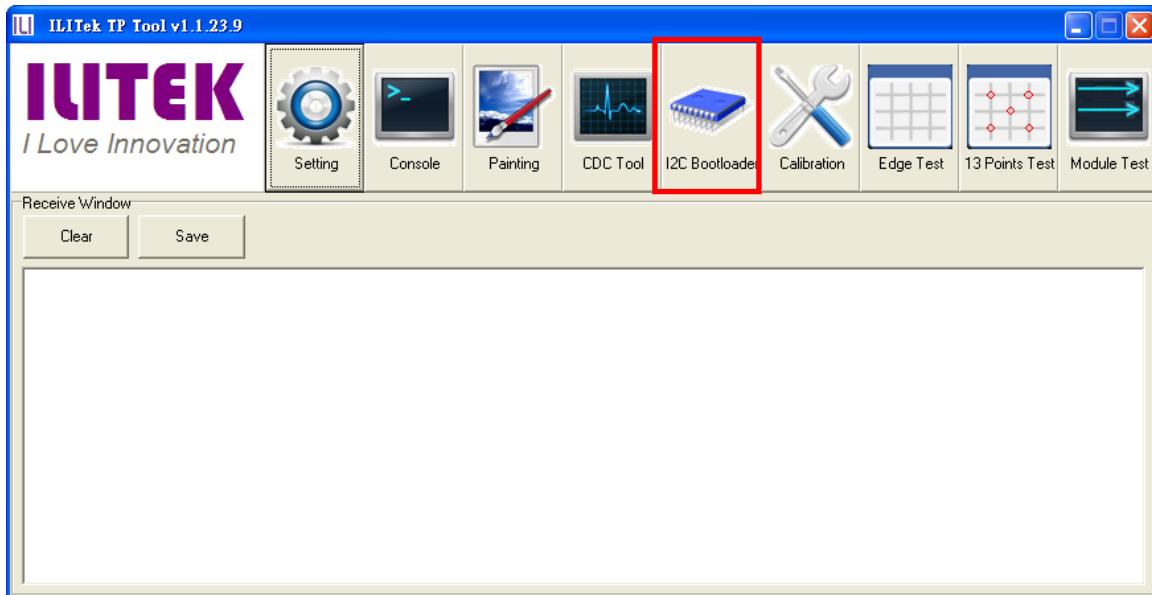

*The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.*

## 2.5 I<sup>2</sup>C Bootloader

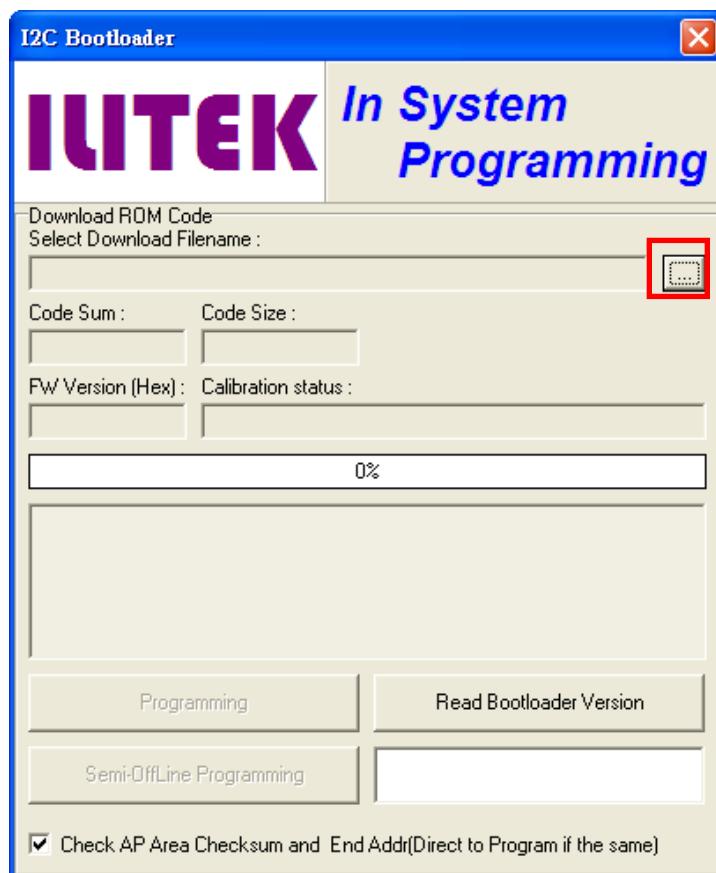

ILITek TP Tool supports I<sup>2</sup>C Bootloader function. The following steps will show how to program a hex file to IC by online and offline method

### 2.5.1 I<sup>2</sup>C Bootloader Online Programming

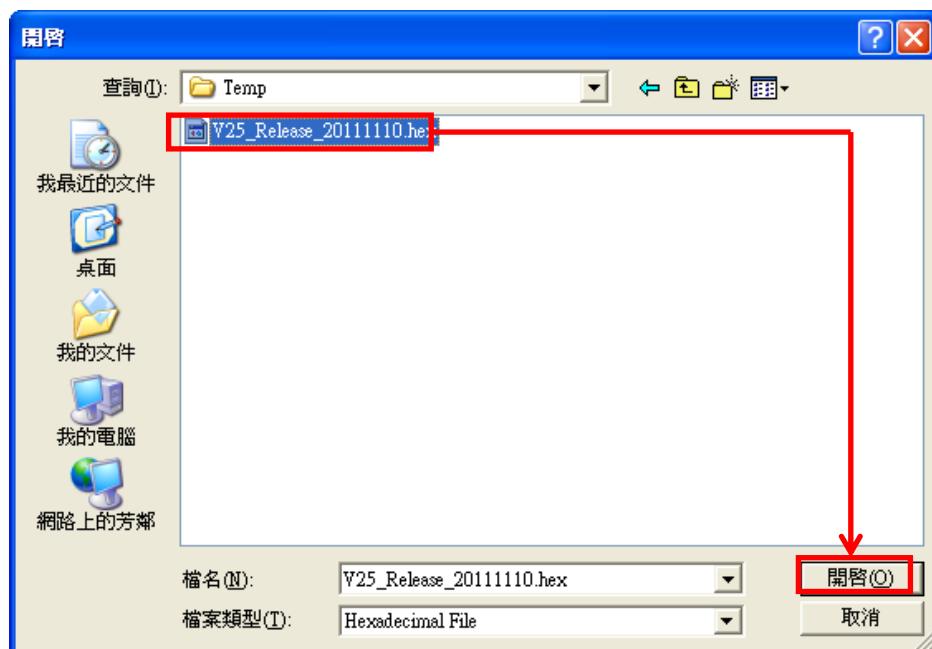

**Step 1:** Click “I2C Bootloader” button

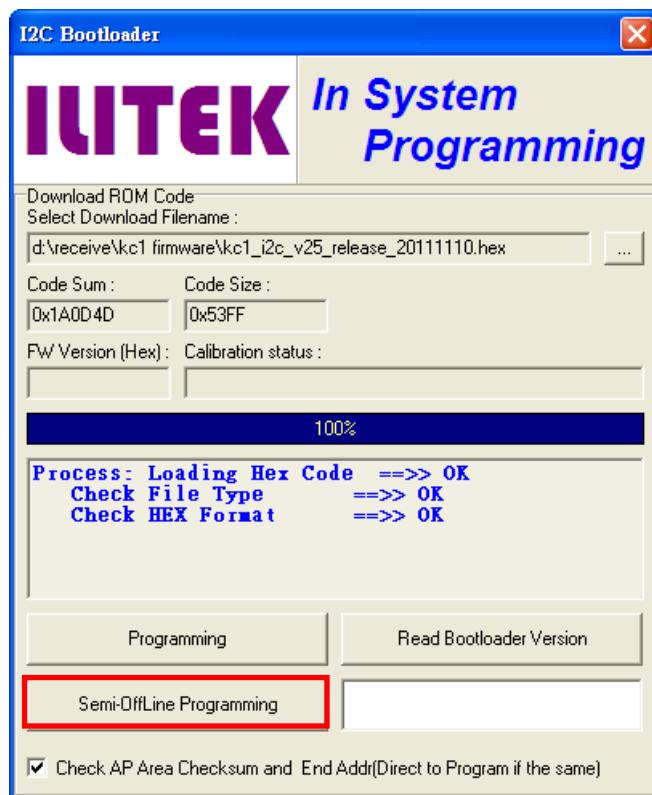

Step 2: Click “...” button

Step 3: Select firmware Hex file

Step 4: Click “Programming” button

Step 5: After the firmware update success, software will show the new firmware version.

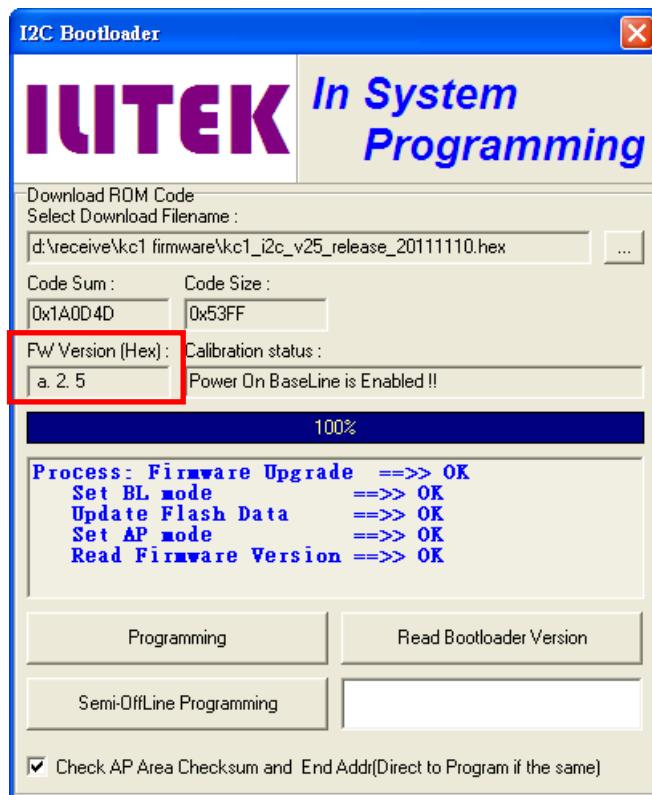

Figure 2-5: I<sup>2</sup>C Bootloader

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

**Note:** When update failed, the software will show the unfinished item. Table 2-4 will explain unfinished items.

**Figure 2-6: Programming failed**

**Table 2-4: The description of unfinished items**

NO.	Item	Description
1	<b>Set BL Mode</b>	Cannot switch into BL mode
2	<b>Process Hex Code</b>	Cannot read programming hex file
3	<b>Update Flash Data</b>	Cannot programming file into IC
4	<b>Set AP mode</b>	Cannot switch into BL mode
5	<b>Read Firmware Version</b>	Cannot read firmware version

---

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

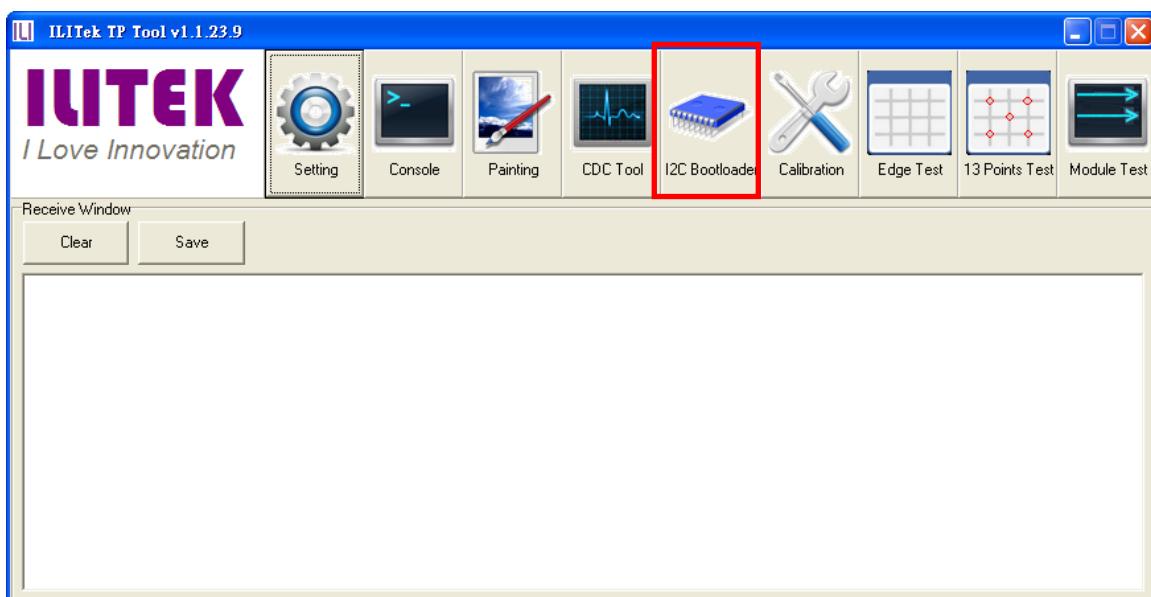

## 2.5.1 I<sup>2</sup>C Bootloader Offline Programming

Before offline programming, please make sure bridge version is V4.

**Figure 2-7: V4 Bridge**

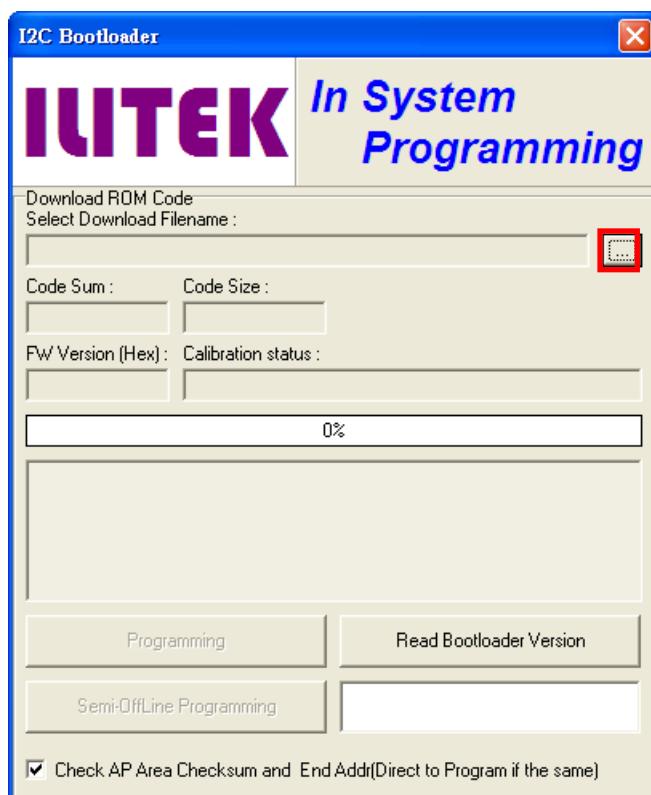

**Step 1:** Click “I<sup>2</sup>C Bootloader” button.

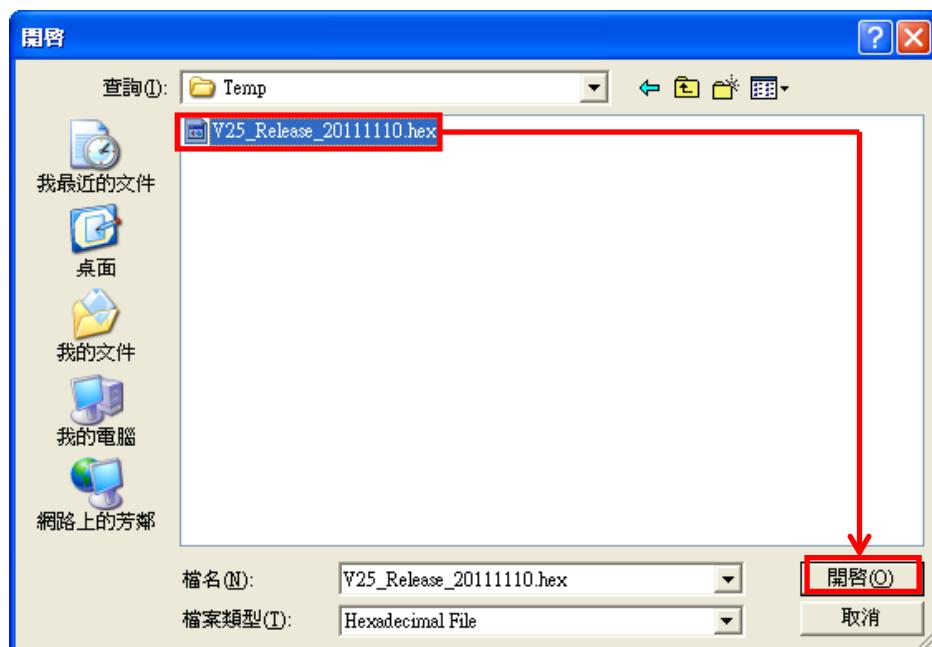

---

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

Step 2: Click “...”button.

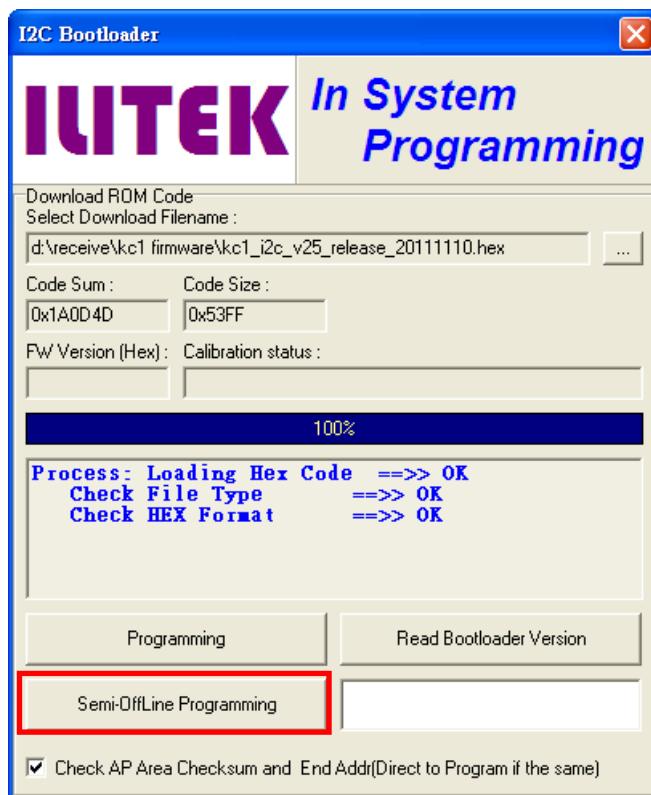

Step 3: Select firmware hex file

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

Step 4: Click “Semi-OffLine Programming” button.

Step 5: After the firmware update success, software will show the new firmware version. The firmware hex file has been stored into the bridge.

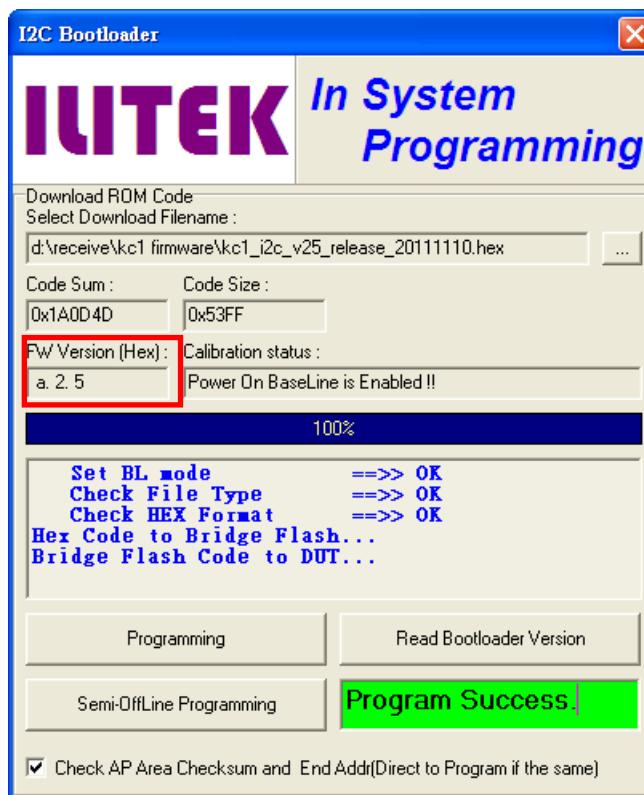

Figure 2-8: I<sup>2</sup>C Bootloader

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

**Step 6:** In the future, just press the button to update firmware.

**Step 7:** Programming success until the programming light are not flashing

Note: During offline programming, bridge will show different lights, Table 2-5 will explain.

**Table 2-5: Offline programming light description**

Light	Status	Description	Troubleshooting
	<b>Green Light</b>	Programming Success	
	<b>Green Blinking</b>	MCU Kernel Version Is not match	Please confirm IC and firmware version
	<b>Interaction Blinking</b>	Programming	
	<b>Orange Blinking</b>	CheckSum failed	Check SMBus connection and reprogramming
	<b>Orange Light</b>	Start program	
	<b>Red Light</b>	AP/BL Mode switch failed	Check SMBus connection and reprogramming
	<b>Red Blinking</b>	Bridge empty	Use TP tool programming firmware into bridge

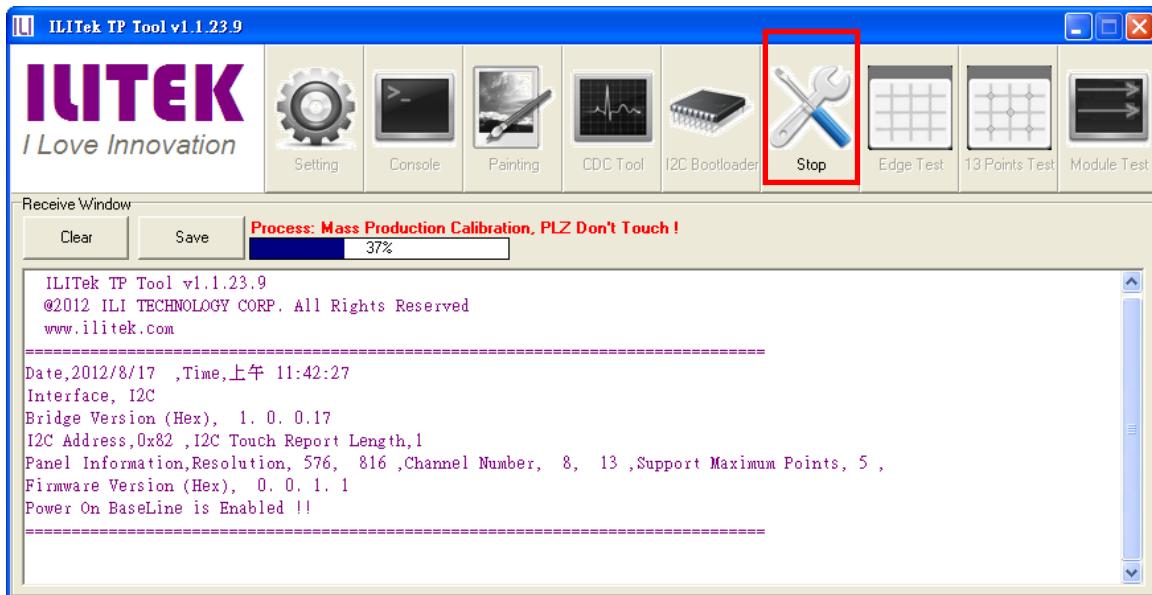

## 2.6 Calibration

ILITek TP Tool supports Calibration function. The touch panel is calibrated with the system environment.

**Note 1: This command is only suggested to be used for mass production purpose.**

**Note 2: When using this command, it is very important to avoid any touch object surrounding the whole system during the calibrating period.**

**Note 3: This command need some time to execute. It takes about 7 seconds to be finished.**

Message Box will show warning message and calibration finished message.

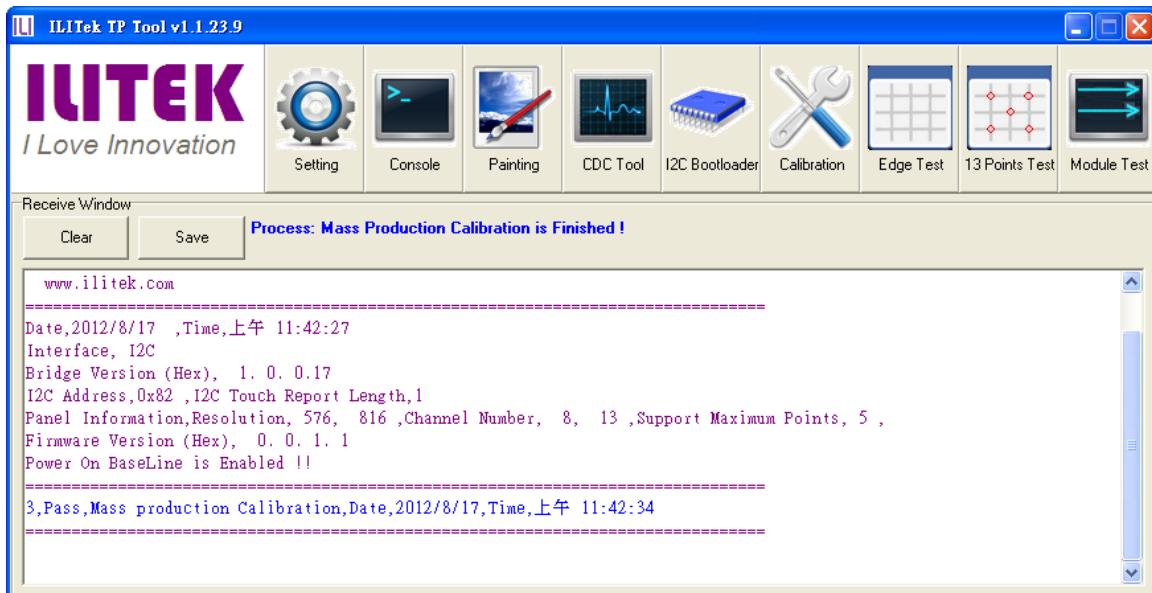

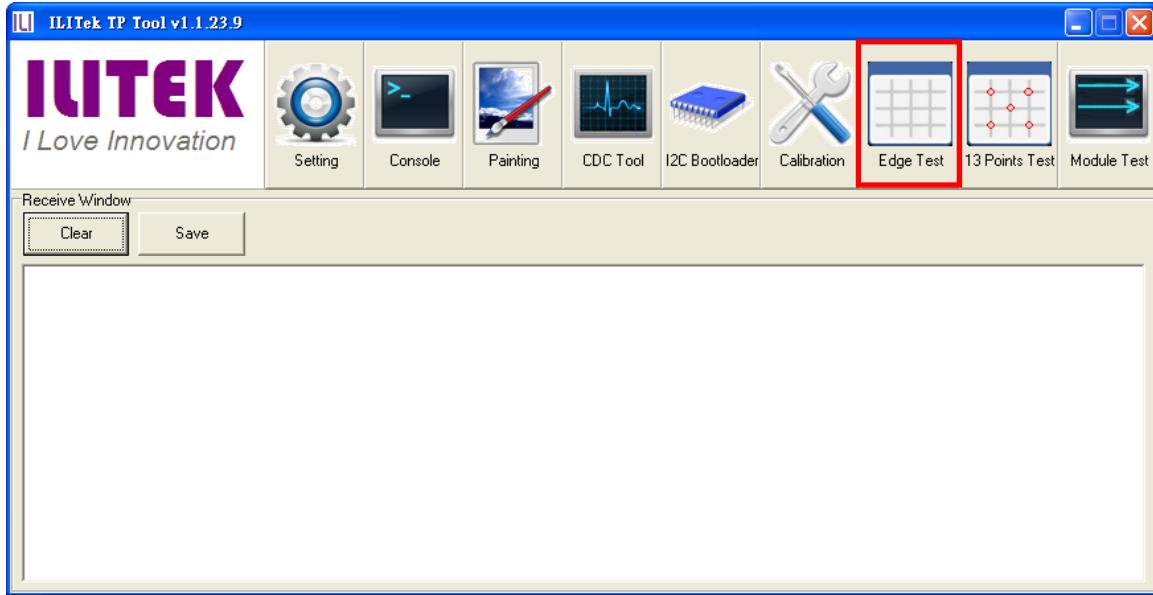

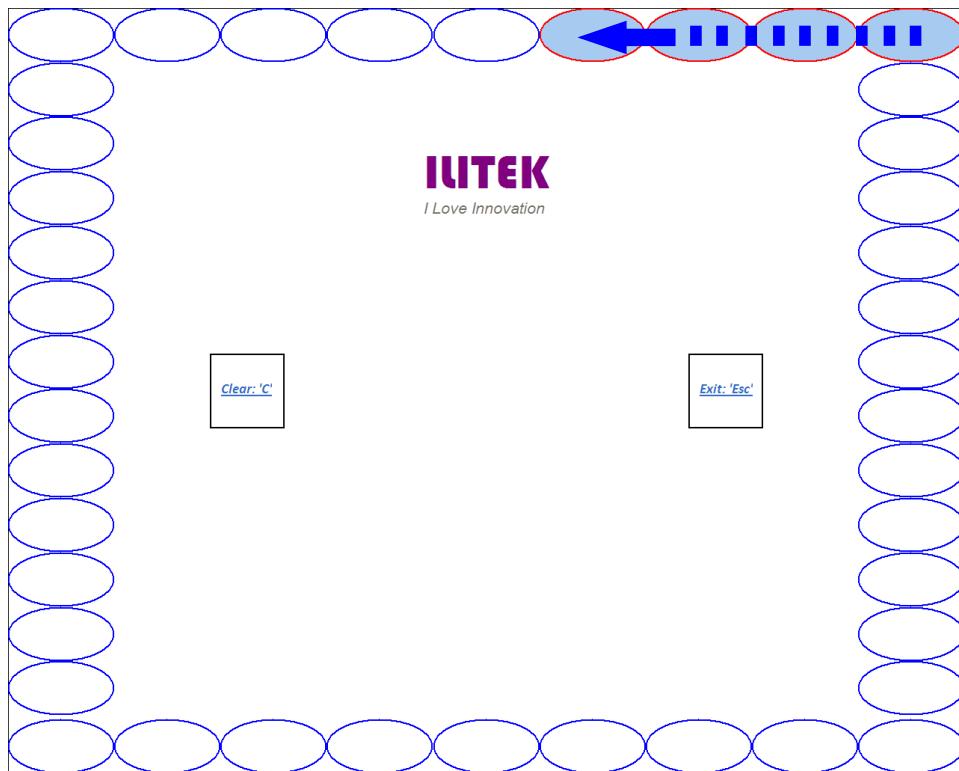

Figure 2-9: Calibration

## 2.7 Edge Test

ILITek TP Tool supports Edge Test function.

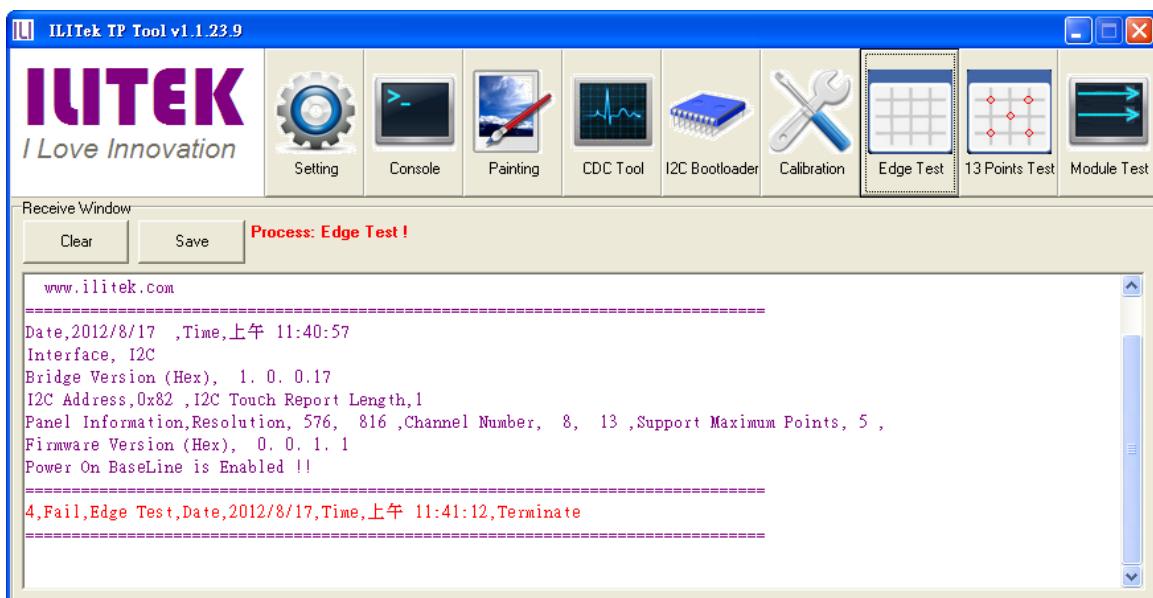

Draw on the blue icon and clean all icons to pass this test.

---

The information contained herein is the exclusive property of ILI Technology Corp. and shall not be distributed, reproduced, or disclosed in whole or in part without prior written permission of ILI Technology Corp.

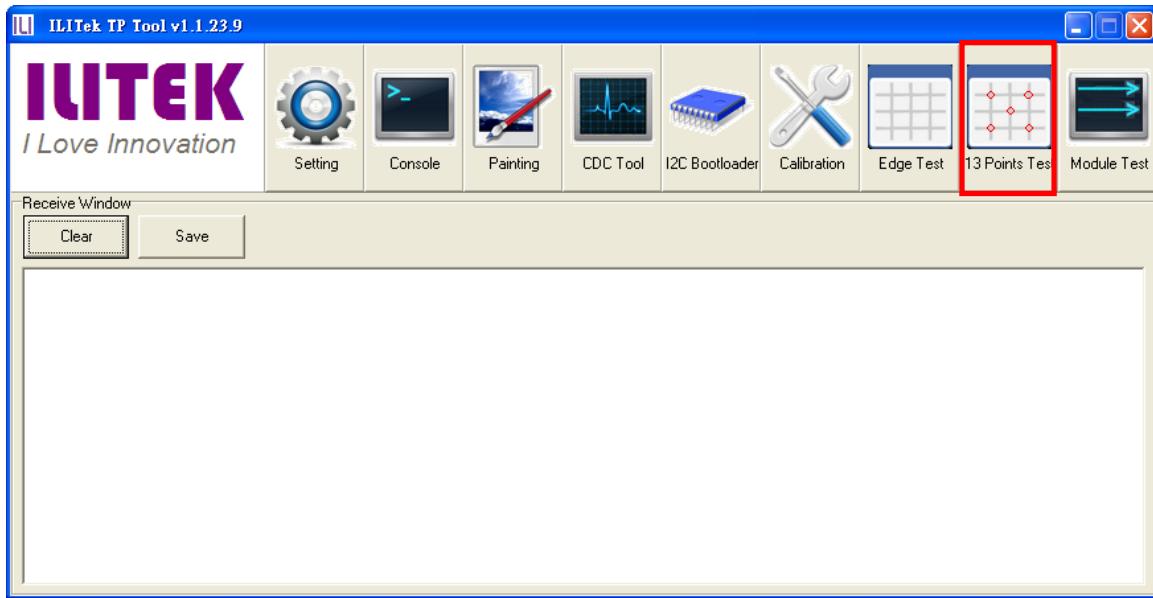

Message Box will show Pass/Fail result.

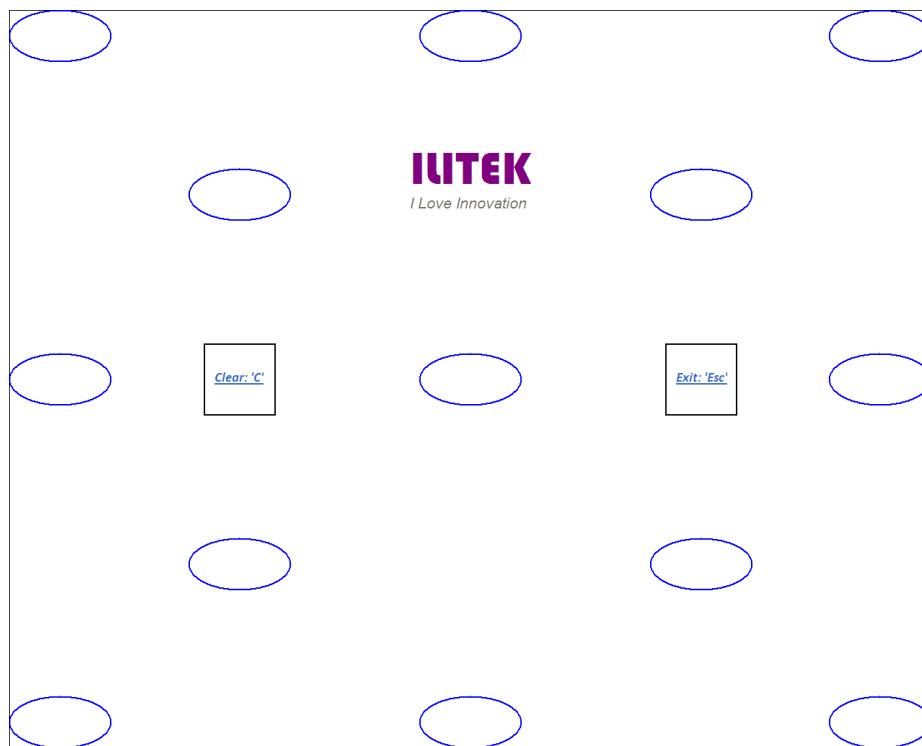

**Figure 2-10: Edge Test**

## 2.8 13 Points Test

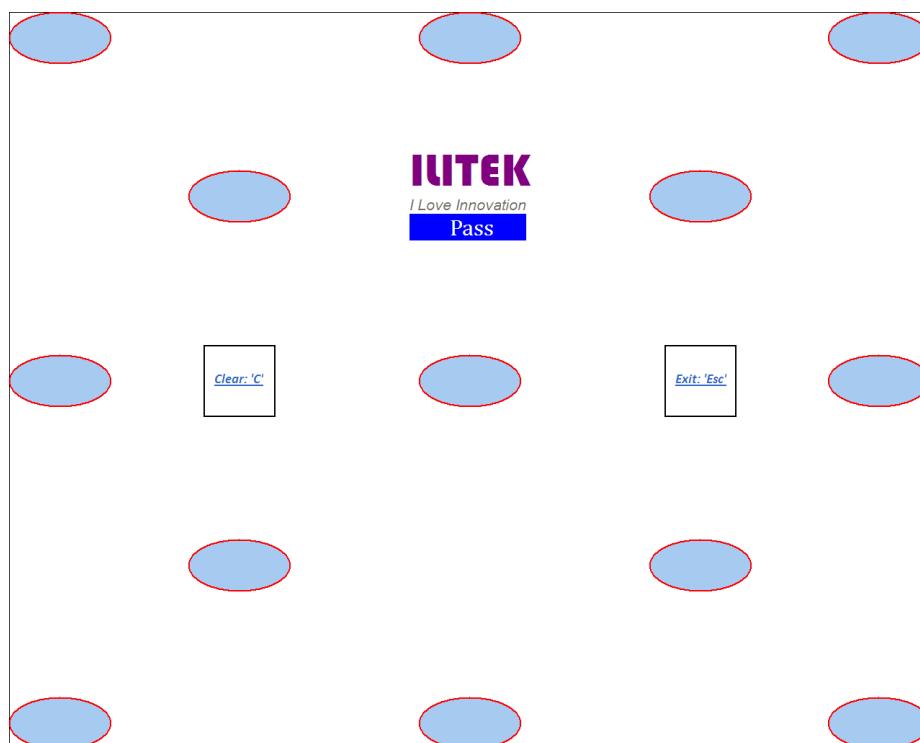

ILITek TP Tool supports 13 Points Test function. This function is used for test sensor accuracy.

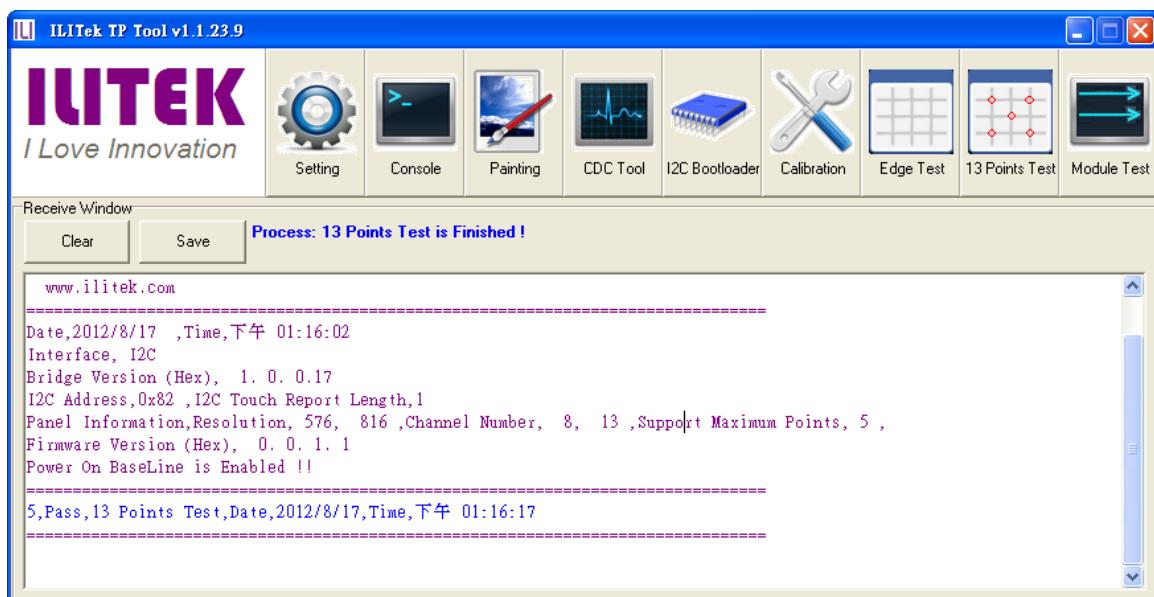

Tap on the blue icon.

Clean all the blue icon will pass.

Message Box will show Pass/Fail result.

## 2.9 Module Test

ILITek TP Tool supports Module Test function. It supports some of patterns like single line test and dual lines test.

Module Test will execute “FW Version Check” → “All Node Test” → “Trace Loading Check” → “Mass Production Calibration” → “Edge Test” → “13 Points Test” → “Dual-Points Test” → “Single Line Test” → “Dual-Line Test”

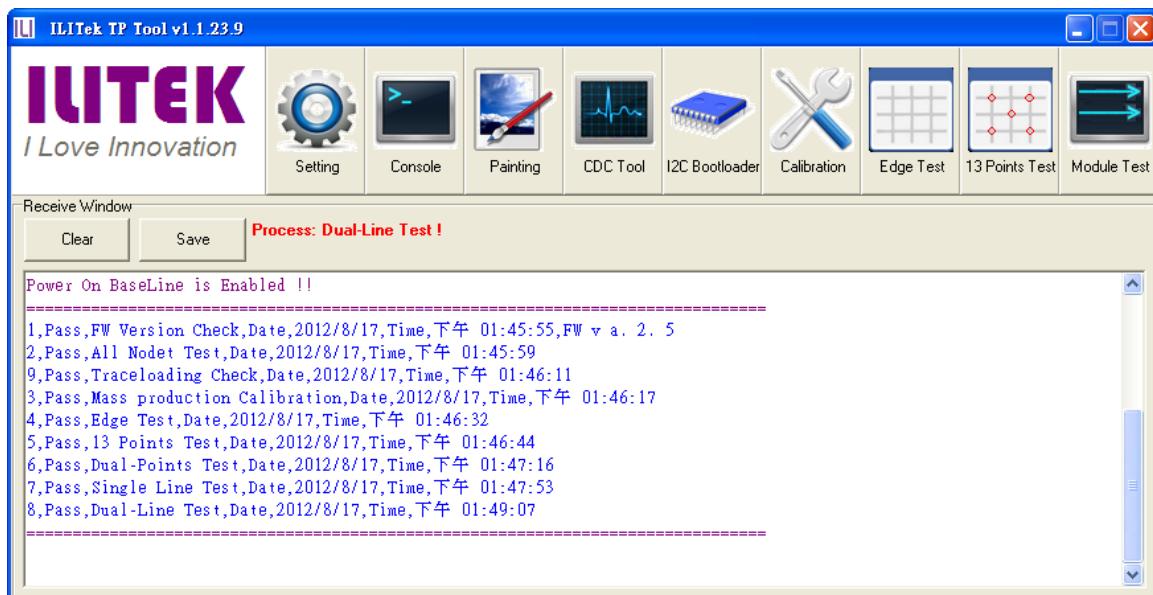

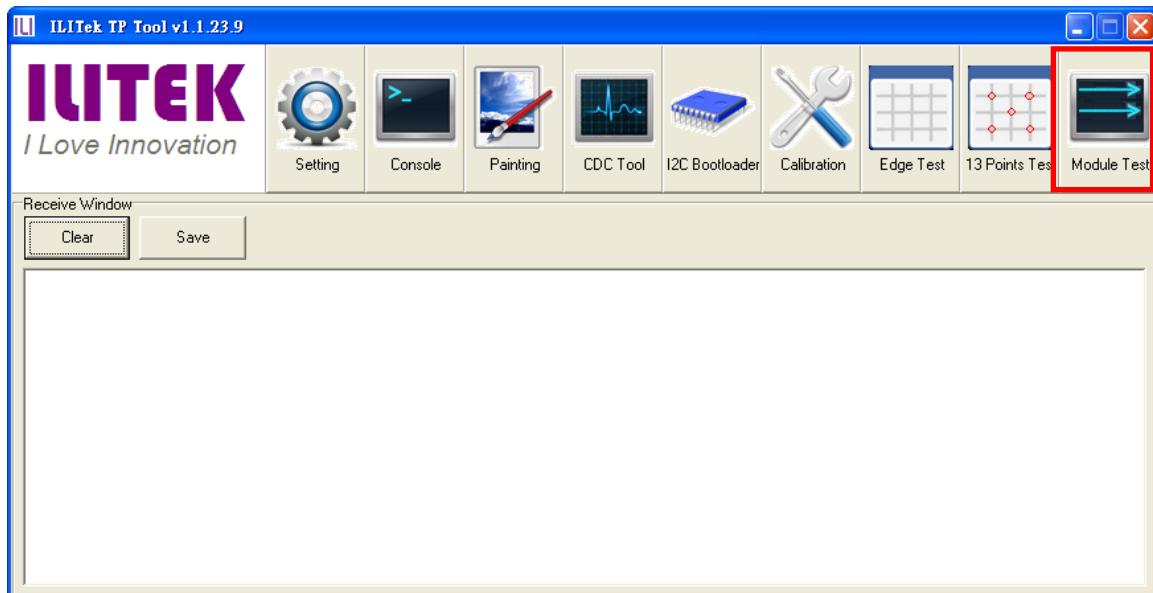

Figure 2-12: Module Test
